

# Continuing Professional Development Certificate

## The impact of emerging rehabilitation technologies on serious injury damages

**Date:** Thursday 8 February 2018

**Time:** 1.15pm - 2.00pm

**Speaker:** Mark Burton and Joe MacManus, Partners, Kennedys Law LLP

In this IIL lecture Joe and Mark looked at the impact of technology on various types of injury claims and different types of heads of loss, such as Care. They commented on how this technology will change the landscape for insurers.

Joe and Mark discussed: - amputation claims and how technology is radically changing these claims - personalised medicine, the role of technology and its impact on the insurance market - the long-term impact of 3D technology on claims - Care tech - 'Brain in hand' and its impact on brain injury claims - new technology coming onto the market and its impact on care claims - Osseointegration and predictions for the future.

By the end of this lecture members would have gained an insight into:

- How technology is changing the injury claims landscape
- What the technology is
- The impact of those changes and predictions for the future.

This lecture or podcast can be included as part of your CPD requirement should you consider it relevant to your professional development needs. It is recommended that you keep any evidence of the CPD activity you have completed and upload copies to the recording tool as the CII may ask to see this if your record is selected for review.
