The bigger the questions our changing climate poses, the better our answers need to be.

As natural catastrophes increase in frequency and severity, no one has all the answers. But what we do have at Swiss Re is the depth of expertise and global capacity to offer innovative ways to transfer financial risk and rebuild. Moreover, we have the most advanced proprietary natural catastrophe modelling system in the re/insurance industry. Pioneered in partnership with scientists and engineers, this provides our clients with a unique, constantly updated perspective on natural catastrophe risks. So can there be anyone better placed to help you anticipate, evaluate and mitigate the impact of climate change? At Swiss Re, risk is our raw material; what we create is opportunity.
