

Continuing Professional Development Certificate

The day the sky caught fire and other major onshore energy catastrophes

Date: Monday 23 April 2018

Time: 1.15pm - 2.00pm

Speaker:

Robert Glynn ACII, Director Risk Management, Marine and Natural Resources Division, Price Forbes

In this IIL lecture Robert Glynn analysed some of the world's largest onshore energy losses since 1974 and the lessons that today's insurers can learn from these accidents. Robert commenced his lecture with a film that was made after the LPG storage explosions in Mexico City in 1984, and his presentation discussed this loss and a number of other major onshore energy related losses from 1974 through to the present day.

By the end of this lecture, members would have gained an insight into:

By reviewing the major energy losses over the last 44 years, a better understanding may be had of:

- Why things go wrong
- What to look out for
- What can be learnt by others' mistakes.

This lecture or podcast can be included as part of your CPD requirement should you consider it relevant to your professional development needs. It is recommended that you keep any evidence of the CPD activity you have completed and upload copies to the recording tool as the CII may ask to see this if your record is selected for review.
