

Continuing Professional Development Certificate

Understanding mild traumatic brain injury: the tip of the iceberg

Date: Thursday 28 February 2019

Time: 1.10pm - 1.55pm

Speaker: Dr Steven Allder, Consultant Neurologist Re:Cognition Health

In this Accident lecture Dr Allder updated members' understanding of the diagnosis and prognosis of mTBI and provided an insight into how current research is changing our ability to detect chronic structural and functional brain injury due to mTBI and how this changes our interpretation of the long-term symptoms and their prognosis.

By the end of this lecture members would have gained an insight into:

- Current advanced clinical and imaging techniques for diagnosis of mTBI
- The limitations of today's thinking.
- How imaging biomarker research is changing the global understanding and interpretation of mTBI.

This lecture or podcast can be included as part of your CPD requirement should you consider it relevant to your professional development needs. It is recommended that you keep any evidence of the CPD activity you have completed and upload copies to the recording tool as the CII may ask to see this if your record is selected for review.
