Smart warehousing: the changing face of distribution

Date: Wednesday 2 October 2019

Time: 1.10pm - 1.55pm

Speaker: Iain Wilcox, CEO & Founder, GWT Insight Ltd

In this IIL Property lecture Iain Wilcox discussed the impact that the Internet of Things (IoT) is having on Commercial Property and Warehousing and the opportunities that it provides for insurers and brokers alike to develop new products and services; and to use and exploit the wide range of data available in buildings to predict and proactively manage risk in real time for the benefit of all stakeholders. This is driven from experience gained by Built Asset Sector, learning from the lessons driving sustainability and energy efficiency.

By the end of this lecture, members would have gained an insight into:

- The value of real time data in Commercial Property & Warehousing
- How IoT works in Commercial Property – practical examples
- The potential impact on the insurance industry

This lecture or podcast can be included as part of your CPD requirement should you consider it relevant to your professional development needs. It is recommended that you keep any evidence of the CPD activity you have completed and upload copies to the recording tool as the CII may ask to see this if your record is selected for review.

CII CPD event accredited - demonstrates the quality of an event and that it meets CII member CPD scheme requirements.
