A general overview of the Reinsurance Market

Date: Wednesday, 06 November 2019

Time: 1.10pm - 1.55pm

Speaker:

David Flandro, Managing Director, Analytics, Hyperion X

In this IIL Reinsurance lecture David Flandro talked about the disruption currently taking place in (re)insurance markets which was at its most acute since the culmination of the financial crisis. Industry reserves, deteriorating earlier catastrophe losses, and eye-popping expense ratios were combining with macro headwinds, the changes in investor appetite and less predictable global capital flows. All of this was driving an increased focus on risk selection and costs of capital. The most visible result was a hardening of pricing across multiple business lines, but the solution this time may not be capital driven, but technology driven.

By the end of this lecture, members would have gained an insight into:

- The state of the current (re)insurance market
- How the Market may respond
- Ideas for how the market might evolve to meet its current challenges, especially through the use of technology.

This lecture or podcast can be included as part of your CPD requirement should you consider it relevant to your professional development needs. It is recommended that you keep any evidence of the CPD activity you have completed and upload copies to the recording tool as the CII may ask to see this if your record is selected for review.
