G forces: How flight modelling uncovered the truth about the Shoreham air accident, 2015

Date: Wednesday 26 February 2020

Time: 1.10pm - 1.55pm

Speaker: Paul Jenkins, Snr VP Sales & Marketing and John Jeffrey CEO, J2 Aircraft Dynamics

In this IIL Aviation lecture members were reminded that the Shoreham air accident shocked the UK and there was a lot of conjecture as the Pilots prosecution for manslaughter followed so Mr Jeffery, as defence expert, walked attendees through the method and process that enabled the court to gain a more detailed and clearer understanding of what could have happened that gave rise to the crash as well as other scenarios that were less likely to have happened.

By the end of this lecture, members would have gained an insight into:

- The power of using a consistent methodology and approach when investigating and analysing air accidents
- Why the science matters • How the evidence is built up
- Why it is important that expert evidence is not just examined in isolation but the relationships between different expert's evidence are clearly understood.

This lecture or podcast can be included as part of your CPD requirement should you consider it relevant to your professional development needs. It is recommended that you keep any evidence of the CPD activity you have completed and upload copies to the recording tool as the CII may ask to see this if your record is selected for review.

CII CPD event accredited - demonstrates the quality of an event and that it meets CII member CPD scheme requirements.
