

Continuing Professional Development Certificate

The Human Factor – Man made energy losses and their causation

Date: Thursday 27 February 2020

Time: 1.10pm - 1.55pm

Speaker: Robert Glynn, ACII, Director Risk Management, Marine, Energy & Natural Resources Division, Price Forbes

In this ILL Marine & Energy lecture, Robert Glynn discussed various energy related losses in detail, explaining how people's actions either caused or exacerbated these incidents.

By the end of this lecture, members would have gained an insight into:

- How human actions can lead to catastrophe
- The importance of appropriate training
- The reasons why procedures are developed and should be followed
- Why it is important to have experienced personnel involved in all decision making.

This lecture or podcast can be included as part of your CPD requirement should you consider it relevant to your professional development needs. It is recommended that you keep any evidence of the CPD activity you have completed and upload copies to the recording tool as the CII may ask to see this if your record is selected for review.
