Cyber Catastrophe Modelling: Capturing the complexity of cyber

Date: Wednesday 04 November 2020

Time: 1.00pm - 2.00pm

Speaker: Bethany Vohlers, Senior Manager, Europe & Asia Lead, Verisk Cyber Solutions, Verisk

In this Insurance Institute of London webinar, Bethany Vohlers introduced the foundations of cyber risk and cyber catastrophe modelling, including the challenges unique to cyber and the modelling frameworks that capture its complexity.

This webinar was the third in a series of joint catastrophe modelling webinars between the Insurance Institute of London and AIR Worldwide (a Verisk business), aimed at improving members understanding of developments in extreme event modelling and risk evaluation in today's insurance world.

By the end of this event attendees will have gained an insight into:

- What is cyber risk? How has it evolved through time?
- How can catastrophe models address the unique challenges introduced by cyber?
- Identifying three key modelling frameworks for capturing exposure to complex cyber risks

CII CPD event accredited - demonstrates the quality of an event and that it meets CII member CPD scheme requirements.

This lecture or podcast can be included as part of your CPD requirement should you consider it relevant to your professional development needs. It is recommended that you keep any evidence of the CPD activity you have completed and upload copies to the recording tool as the CII may ask to see this if your record is selected for review.
