Flood risk assessment and management for 'high risk' sites

Date Wednesday 10 March 2021

Time 1.00pm - 2.00pm

Speaker Daniel Watson, Principal Hydrologist, SLR Consulting

In this IIL property investors webinar, Daniel Watson discussed how flood risk data can be used to help manage risks and allow flood cover to be provided in areas where there are genuine flood risk concerns.

By the end of this webinar members would have gained an insight into:

- The value of drawing on a wide range of data sources to understand flood risk
- The importance of good design and quality assurance in managing flood risk
- Addressing flood risk through ongoing operational management

CII CPD event accredited - demonstrates the quality of an event and that it meets CII member CPD scheme requirements.

This lecture or podcast can be included as part of your CPD requirement should you consider it relevant to your professional development needs. It is recommended that you keep any evidence of the CPD activity you have completed and upload copies to the recording tool as the CII may ask to see this if your record is selected for review.
