

# WILLIAM CHO

**Global Head of Weather and Forensics**  
MatthewsDaniel

---

William joined MatthewsDaniel in 2014 with over 15 years' experience in weather risk assessment for marine and energy industries. William has a passion in numerical modelling and statistical analysis and, since joining MatthewsDaniel, he created a plethora of instrumental tools to lower costs in assisting marine and energy clients worldwide. In his current capacity, William is responsible for providing operational weather forecasts for marine operations as well as hindcast weather analysis for claim-event verification and investigation.
