## 2020 definitely blew...But why no offshore hurricane claims?

### Date

Tuesday 11 May 2021

### Time

3.00pm - 4.00pm

### Speakers

James C. Vavasour, President, Group Marine Director, MatthewsDaniel  
William Cho, Global Head of Weather and Forensics, MatthewsDaniel

In this IIL marine & energy webinar, James Vavasour and William Cho looked back on the 2020 Gulf of Mexico Hurricane season, the reasons why it was such an active season and why there were so few physical damage losses emanating from the offshore oil patch. The speakers also discussed if the lack of damage was a future trend given the quality of assets in the Gulf of Mexico and a brief prediction of what the 2021 season may have in store.

### By the end of this webinar members would have gained an insight into:

- Meteorological features of hurricanes
- How they impact oil & gas assets in the Gulf of Mexico
- The risks associated with insuring assets in the Gulf of Mexico

CII CPD event accredited - demonstrates the quality of an event and that it meets CII member CPD scheme requirements.

This lecture or podcast can be included as part of your CPD requirement should you consider it relevant to your professional development needs. It is recommended that you keep any evidence of the CPD activity you have completed and upload copies to the recording tool as the CII may ask to see this if your record is selected for review.
