

# Continuing Professional Development Certificate

## Dementia: How can we insure our futures?

**Date:** Thursday 5 October 2017

**Time:** 1.15pm - 2.00pm

**Speakers:** Sian Fisher ACII, CEO, CII and Professor Diane Hanger, Professor of Neuroscience, King's College London

In this IIL lecture Sian Fisher and Professor Diane Hanger talked about one of the largest challenges we face in society – the increasing number of people suffering from Dementia. The number of people suffering from Dementia is rising rapidly and, as a country, we need to unite to be better equipped to face these challenges head on. The Insurance United Against Dementia campaign is a first in its kind to bring the sector together to actively work to tackle a wider social problem as one.

By the end of this lecture members would have gained an insight into:

- How an aging population is leading to a greater number of people suffering from Dementia
- Women, making up a larger proportion of the elderly, are particularly at risk with 61% of people with Dementia being women
- How you can make a difference by supporting Insurance United Against Dementia

This lecture or podcast can be included as part of your CPD requirement should you consider it relevant to your professional development needs. It is recommended that you keep any evidence of the CPD activity you have completed and upload copies to the recording tool as the CII may ask to see this if your record is selected for review.
