

Continuing Professional Development Certificate

Sustainability strategy of developments

Date: Thursday 2 November 2017

Time: 1.15pm - 2.00pm

Speaker: Anita Mitchell, Head of Sustainability - Europe, Lendlease

In this IIL lecture Anita talked about the importance of sustainability in regeneration projects around the world and what this means for the real estate and construction industries going forward. Sustainability is a word that means many things to many people, but it is an increasing focus for the built environment. How to tread lightly on the planet while also assisting governments to manage increasingly scarce resources and manage social issues such as job creation and creating safer and more prosperous urban environments.

By the end of this lecture members would have gained an insight into:

- Understanding the drivers of sustainability
- The details of sustainability initiatives in major urban renewal projects internationally and in London
- Identifying the challenges and solutions facing the property and construction sectors

This lecture or podcast can be included as part of your CPD requirement should you consider it relevant to your professional development needs. It is recommended that you keep any evidence of the CPD activity you have completed and upload copies to the recording tool as the CII may ask to see this if your record is selected for review.
